PROFILE

Full stack engineer with 5+ years building microservice platforms for healthcare, e-commerce, automotive and consumer products, with teams in the US, UAE, South Korea and Pakistan. I lead a 20+ microservice healthcare platform end to end, from requirements with the business to Terraform-managed GKE environments, and build AI agents and automation (LLM document extraction) on React / Next.js / Vue front ends and NestJS, Node.js and Python services over Kafka, RabbitMQ and gRPC. Led backend teams of up to six engineers and cut server response times by ~40%. CKAD and Salesforce B2C Commerce certified.

TECHNICAL SKILLS

Frontend	React, Next.js, Vue.js, TypeScript, JavaScript, micro-frontends, React Query, Tailwind CSS, jQuery, HTML / CSS
Backend	NestJS, Node.js, Express, Fastify, Python, FastAPI, asyncio, Django, Laravel; working knowledge of Go
Data	PostgreSQL, MySQL, MongoDB (CSFLE), Redis, Prisma, TypeORM
APIs & messaging	REST, GraphQL, gRPC, Kafka, RabbitMQ, Swagger / OpenAPI, Ambassador API gateway
DevOps & cloud	Terraform / IaC, Kubernetes (CKAD), Helm, Docker, GCP (GKE Autopilot, VPC peering, Cloud Armor), AWS (Lambda, EKS), Azure, GitHub Actions, Jenkins, Azure DevOps
AI & automation	AI agents and automation, LLM integrations (Kimi), OCR / vision document extraction, Hume AI, AssemblyAI
E-commerce	Salesforce Commerce Cloud (SFRA, OCAPI), PayPal, Braintree, TossPay

PROFESSIONAL EXPERIENCE

Lead Full Stack Cloud Engineer · Code Encoders Dec 2024 – Present
Lahore, Pakistan · BlockMed Pro (healthcare platform)

- Lead engineer on BlockMed Pro, a healthcare platform of 20+ microservices (patient, pharmacy, pharmaceutical, clinic and super-admin modules); work directly with the business on requirements, manage Jira and assign work across the team.
- Database per service with RabbitMQ events; patient and medical-report data in separate MongoDB databases with client-side field-level encryption (CSFLE); separate read and write API gateways; micro-frontends in Next.js.
- Infrastructure as code with Terraform: GKE Autopilot on a private VPC with dev, QA, UAT, staging and production environments, and VPC peering between two clusters.
- Led backend architecture on FastAPI and Python async patterns; Redis caching and a refactor cut server response times by ~40%; self-hosted API gateways with DNS ingress, Cloud Armor rate limiting / DDoS policies, and CI/CD on GitHub Actions and Jenkins; PR review and mentoring.

Stack: NestJS, Python, FastAPI, Next.js, RabbitMQ, MongoDB (CSFLE), Redis, Terraform, GCP (GKE Autopilot, VPC), Kubernetes, GitHub Actions, Jenkins

Freelance Backend Engineer (Contract) · Upwork 2026 · 2 months
Remote · Bill of Lading module of Octopus, a trade payment platform

- Delivered the Bill of Lading module end to end in 8 weeks — a React (React Query, Tailwind) workflow on a NestJS / Prisma / PostgreSQL backend, from invoice intake to a bank-ready document pack.
- Kimi LLM extraction of shipper, buyer, goods and weight data with operator review in a gated 5-step wizard; Excel templates rendered to PDF with headless LibreOffice; tamper-evident approvals (write-once, checksummed, versioned) with a bank verification link.

Lead Backend Engineer · Consforc LLC Jul 2023 – Sep 2024
Boston / New York, USA (Remote) · Charmy (dating app on the App Store)

- Built the backend of Charmy from scratch: a NestJS monorepo of microservices (auth, account, profile, chat, order, charities, notification), each with its own PostgreSQL database (TypeORM).
- Kafka for inter-service events; an Ambassador API gateway exposing GraphQL plus public Swagger APIs; deployed on Kubernetes in Azure.
- Led Python / FastAPI microservices development and a 6-member backend team; gRPC for internal calls, Redis caching, Docker, and CI/CD in Azure DevOps.

Stack: NestJS, TypeORM, PostgreSQL, Kafka, GraphQL, Python, FastAPI, gRPC, Redis, Docker, Kubernetes, Azure

Lead Backend Engineer · Otobucks

Jan 2023 – Sep 2023

UAE (Remote) · automotive services platform launched in Dubai

- Led the backend of Otobucks, an automotive services platform with web and mobile apps (similar to PakWheels in Pakistan), on Python, FastAPI, Redis and PostgreSQL.
- Designed MongoDB models with aggregation pipelines and virtual relations; built and optimized the Service Provider Panel, Admin Panel and Android app; ran code reviews and set quality standards.

Stack: Python, FastAPI, Node.js, Express, React, PostgreSQL, Redis, MongoDB, MySQL, AWS

Lead Software Engineer · Eguana Commerce

Dec 2022 – Aug 2023

Seoul, South Korea (Remote) · Under Armour

- Led Under Armour's transition to headless commerce on Salesforce Commerce Cloud, redesigning the product listing page for scalability and performance.
- Migrated cartridges from SiteGenesis to SFRA; built Impex jobs, services and the TossPay payment integration; JS / ISML optimization and production support.
- Implemented Return Merchandise Authorization and personal-information-protection compliance (consents, action logs); reviewed PRs and managed deployments.

Software Engineer · Aiva Creative

Jun 2021 – Dec 2022

Lahore, Pakistan (Hybrid) · L'Oréal Paris Japan, Lightning New York

- Built Salesforce Commerce Cloud features across B2B and B2C brands, including L'Oréal Paris (Japan region) and the Lightning New York e-commerce platform, with OCAPI integrations.
- Delivered L'Oréal Japan integrations for PayPal, Braintree, Yotpo and Google Tag Manager, plus Impex jobs.
- Client-side integrations with AJAX and server-side rendering in core JavaScript across PDP, PLP, Cart and Checkout, with a focus on SEO.

SELECTED PROJECT

Octopus · AI-powered trade payment platform (team project)

2026

octopus.multilines-group.com

- Built the platform's AI document layer — Kimi LLM extraction and OCR / vision document extraction behind its AI compliance checks — and its Bill of Lading module (above); contributed across the compliance → QA → bank-execution workflow.

CERTIFICATIONS & EDUCATION

- **Certified Kubernetes Application Developer (CKAD)** · The Linux Foundation / CNCF · Sep 2026 · ID LF-sxz34xuhog · Credly badge
- **Salesforce Certified B2C Commerce Developer**
- Coursera: SQL for Data Science (UC Davis) · Introduction to SQL (University of Michigan) · HTML, CSS & JavaScript for Web Developers (Johns Hopkins University)
- **BS Software Engineering** · Virtual University of Pakistan, Lahore · Feb 2016 – Nov 2020

INTERESTS

Competitive football: attacking midfielder / forward for Real Lahore FC; formerly Atlético de Madrid Academy Pakistan (U-19, PFFF tournaments) and Punjab University Sports Complex teams (2016–2020).
